**Step Up and Be Counted!**

**Student Health Data**

Erin D. Maughan PhD, MS, RN, APHN-BC, FAAN, Martha Dewey Bergren DNS, RN APHN-BC FAAN

---

### Purpose
- Create a nationally standardized data set to describe student health
- Identify and define valid, reliable student health indicators
- Promote data sharing across the care continuum
- Build data for population-based child health research/policy/advocacy

### Background
- Joint initiative of NASN and NASSNC
- 1st data set - 2014-15 school year with 15 data points; expanding yearly
- Local school nurses collect data
- Data Champions aggregate state data

### Potential
- Build robust local, regional, national population health & workforce data
- Evaluate cost effective population health interventions
- Identify at risk groups at neighborhood level
- Support the Triple Aim

### Challenges
- Capacity
- Data integrity
- Data management platform
- Data sharing
- Funding
- Sustainability
- Volunteer fatigue
