**DEMONSTRATIONS**

**DEFINITION**
The part of the exhibit program involving the interaction of exhibit personnel and their audience through corporate presentations, product demonstrations or sampling

**Regulation**
Demonstration areas must be organized within the exhibitor’s space so as not to interfere with any traffic aisle and the demonstration tables must be placed a minimum of 5’0” from the aisle line. Should spectators interfere with the normal traffic flow in the aisle or overflow into neighboring exhibits, exposition management will request that the demonstration be eliminated and a loss of exhibitor points will occur.

**Demonstrations & Marketing Activities**
Exhibitor demonstrations and all marketing/promotional activities must be conducted within the confines of your booth space. Exhibitors are permitted to have demonstrations or promotional activity within their booth, as long as they are set back a minimum of five feet (5’) into the booth, does not obstruct the aisles, and does not prevent access to nearby booths. Any activity that results in the obstruction of aisles, or prevents ready access to nearby exhibitors’ booths, or produces sound levels that exceed 75 decibels, will result in a loss of exhibitor points after the first warning. Please plan accordingly if you plan to have continuous demonstrations. If you intend to conduct any activity that will attract large numbers of attendees, you must purchase enough booth space and orient your booth structures so that the crowd can be accommodated within your booth space. Distribution of pamphlets, brochures, etc. must take place within your booth space only. Orders may be taken during the normal activity on the exhibit floor but retail sales are not permitted.

**Intent**
The aisles are the property of the entire show and each exhibitor has the responsibility to assure proper flow of traffic through the entire show. When large crowds gather to watch a demonstration or for sampling and interfere with the flow of traffic down aisle or create excessive crowds in neighboring booths, it is an infringement on the rights of other exhibitors. Aisles must not be obstructed at any time.

**Sound/Noise**
The use of megaphones, loudspeakers, or public address systems by exhibitors is prohibited. **The decibel level of sound emitting from your booth must not exceed 75.** Excessive noise and RF interference will be grounds for interruption of electrical power to the offending booth. Db and RF levels will be monitored on the floor throughout the week, any objectionable noise will be reviewed, and the exhibitor may be required to turn the levels down or off according to the decision of show management. **Speakers must face into the exhibit booth itself and not into the aisles or into neighboring exhibits.** Live music is prohibited in the exhibit hall. HIMSS reserves the right to determine at what point sound constitutes interference with other exhibitors and it must be discontinued.

**Safety Precautions**
All product demonstrations involving any moving and potentially hazardous machines, displays or parts must have hazard barriers to prevent accidental injury to spectators.

Demonstrations must always be supervised by exhibitor personnel who can stop the demonstration in the event of an emergency and all demonstrations involving potentially hazardous by-products, such as dust, fumes, sparks or flames, must be approved in writing by exposition management 60 days prior to the show.

**Exhibitor Behavior**
Exhibiting companies, and their officers, directors, employees, agents, and others working on the exhibitor’s behalf are expected to conduct themselves in a professional manner at all times.

**Solicitation**
Exhibitors are required to remain in their own booth space during non-exhibit hours. Solicitation outside booth in any way is strictly prohibited.
