Embrace the power of innovation to transform health and lives.
Machine learning and the cloud are fueling moonshots that are already changing how we fight disease and improve health for millions of people. But there’s still so much untapped potential. Healthcare is being transformed entirely with each new technological breakthrough. During the opening keynote, Eric Schmidt will provide his perspectives on what we can do to speed up the progress and make sure technology is being put to its best use, making life better for people everywhere.

Eric Schmidt is the former executive chairman of Alphabet Inc. He was responsible for the external matters of all of the holding company’s businesses, including Google Inc., advising their CEOs and leadership on business and policy issues.

Eric joined Google in 2001 and helped grow the company from a Silicon Valley startup to a global leader in technology. He served as Google’s Chief Executive Officer from 2001–2011, and as chairman from 2011–2015. Prior to Google, Eric held leadership roles at Novell and Sun Microsystems, Inc. He holds a bachelor’s degree in electrical engineering from Princeton University as well as a master’s degree and PhD in computer science from the University of California, Berkeley. He was a member of the President’s Council of Advisors on Science and Technology, Eric is Chairman of the Department of Defense’s Innovation Board and was awarded the Medal for Distinguished Public Service by Secretary of Defense Ashton Carter.

He is the co-author of *The New Digital Age and How Google Works*, and serves on the boards of the Mayo Clinic and the Broad Institute. He’s a Gulfstream pilot, and his philanthropic efforts through The Schmidt Family Foundation focus on climate change, including support of ocean and marine life studies at sea, as well as education, specifically cutting-edge research and technology in the natural sciences and engineering.
KEYNOTE SPEAKERS

All sessions will be held in the Palazzo Ballroom (Level 5).

Friday, March 9 | 8:30 am – 10:15 am

DAVID SHULKIN, MD
Secretary of U.S. Department of Veterans Affairs

VICE ADMIRAL RAQUEL C. BONO
Director, Defense Health Agency (DHA)

IT TAKES A COMMUNITY – DELIVERING 21ST-CENTURY COORDINATED CARE FOR THOSE IN AND OUT OF UNIFORM

David Shulkin, MD
The Honorable David J. Shulkin was nominated by President Trump to serve as the ninth Secretary of Veterans Affairs (VA) and was confirmed by the United States Senate on February 13, 2017. During his HIMSS18 keynote, Secretary Shulkin will talk about medical care for veterans, as well as the changes and innovations occurring at the VA.

Prior to his confirmation as Secretary, Dr. Shulkin served as VA's Under Secretary for Health for 18 months, leading the nation's largest integrated healthcare system, with more than 1,700 sites of care serving nearly nine million veterans. Before his service with VA, Dr. Shulkin held numerous chief executive roles at Morristown Medical Center and the Atlantic Health System Accountable Care Organization. He also served as President and CEO of Beth Israel Medical Center in New York City.

Dr. Shulkin has held numerous physician leadership roles, and he was named one of the “50 Most Influential Physician Executives in the Country” by Modern Healthcare and one of the “100 Most Influential People in American Healthcare.”

Vice Admiral Raquel C. Bono
Vice Admiral Bono leads a joint, integrated combat support agency enabling the Army, Navy, Air Force and Marine Corps medical services to provide a medically ready force to combatant commands in both peacetime and wartime. During her HIMSS18 keynote, Vice Admiral Bono will discuss advancements in military health to ensure seamless data delivery and care coordination.

Vice Admiral Bono saw duty in Operations Desert Shield and Desert Storm as Head, Casualty Receiving, Fleet Hospital Five in Saudi Arabia from August 1990 to March 1991. She was then stationed at Naval Medical Center Portsmouth as Surgeon in the General Surgery Department, Surgical Intensivist in the Medical/Surgical Intensive Care Unit, and Attending Surgeon at the Burn Trauma Unit at Sentara Norfolk General Hospital. Her duties included Division Head of Trauma, Head of theAmbulatory Procedures Department (APD), Chair of the Laboratory Animal Care and Use Committee, Assistant Head of the Clinical Investigations and Research Department, Chair of the Medical Records Committee, and Command Intern Coordinator.
Keller Rinaudo is a robotics and healthcare innovator who is showing the world how drone technology can be used to save lives. During his keynote session, he will share his thoughts on how to test solutions quickly to effectively maximize output, how to emerge as an innovation leader in a sector dominated by entrenched systems, how to discover simple solutions to complex problems, and what technology and robotics mean for the future of healthcare.

Rinaudo is the CEO and co-founder of Zipline, which manages a system of custom robotic aircraft specifically designed to carry life-saving medical supplies to areas in need. Called a “visionary project” by the World Health Organization, “the new face of the aerospace industry” in The New York Times, and one of Business Insider’s “Startups to Watch” in 2017, Zipline uses cutting-edge technology to leapfrog the absence of pre-existing infrastructure all over the globe and deliver medical necessities to healthcare professionals and their patients in the most remote parts of the world. The company currently operates in parts of Africa as well as within three U.S. states. Rinaudo oversees a team of 30 aerospace and software engineers formerly of companies including SpaceX, Boeing and Google, and is based in San Francisco.

Rinaudo was named one of 2016’s “Most Creative People in Business” by Fortune and made Forbes’ prestigious 2017 “30 Under 30” list in the consumer technology category. Fast Company named drones being used for good as one of the “12 tech trends that will shape our lives in 2017” and cited Zipline’s work as proof. Before founding Zipline, Rinaudo was a software engineer with a special interest in robots and autonomous systems. A graduate of Harvard University, he built computers out of RNA and DNA that operate in human cells as molecular doctors and published this research in Nature Biotechnology, becoming one of the youngest first authors in its history.

EARVIN “MAGIC” JOHNSON, JR.
Role Model, Sports Legend and Successful Entrepreneur

PERSPECTIVES ON LEADERSHIP AND HEALTHCARE ADVOCACY

For 12 years, Earvin “Magic” Johnson dominated the court as one of America’s best basketball players. This strong healthcare and technology advocate will close HIMSS18 with what promises to be an insightful keynote session.

Earvin Johnson is the Chairman and Chief Executive Officer of Magic Johnson Enterprises, an investment conglomerate valued at an estimated $1 billion. Since retiring from the NBA more than 20 years ago, the legendary basketball star has morphed into a business powerhouse who has dedicated his life to leaving a positive impact in underserved urban communities.

Earvin has consistently turned heads with his unprecedented partnerships. In his early years as an entrepreneur, he forged an alliance with Sony Pictures to develop Magic Johnson Theatres. In 1998, he teamed with Starbucks to become the only franchisee in the history of the company, acquiring and eventually selling 125 stores. Both ventures served as catalysts for redevelopment in urban communities and are widely recognized as corporate blueprints for engagement and success with urban consumers across the U.S.

Still a commanding presence in the sports world, Earvin made history in 2012 when he became co-owner of the Los Angeles Dodgers, a Major League Baseball franchise purchased for $2 billion. Currently, he is President of Basketball Operations for the Los Angeles Lakers of the National Basketball Association. He also co-owns the Los Angeles Sparks of the WNBA and Major League Soccer’s Los Angeles Football Club.

Through a newly formed fund, Earvin is investing more than $1 billion in U.S. infrastructure improvement. His technology endeavors include a board position with Square – a mobile payment company that supports small businesses and entrepreneurs – as well as a leading investor in a number of minority-owned tech companies. He remains unwaveringly dedicated to working with major corporations and partners to bring jobs and high-quality products and services to underserved communities. Johnson also serves as Chairman and Founder of the Magic Johnson Foundation, where his commitment to transform urban America continues through HIV/AIDS awareness and educational programs.

#HITsecurity

Are you ready for the next big cyberattack? Experience 70+ companies, eight interactive educational challenges, 60+ education sessions, and much more.

Conference Supporter: FairWarning.

Educational Challenges:

• Everyone talks about cyber risk, but no one defines it exactly the same way. Test your cyber risk IQ and compete for an Apple Watch.

• Take CrowdStrike’s Security Health Check to test your skills and knowledge of security best practices and current attack trends.

• Test your endpoint security knowledge, and ensure you’re doing everything you can to protect your organization and patients from cyberattacks.

• Gain visibility into who’s accessing PHI across all your cloud applications.

• See how savvy your cyber knowledge is – featuring data from Proofpoint’s recently launched Healthcare Threat Report.

• Is your organization ready for threats like ransomware and phishing? Find out how to combat these threats and more.

• Test your cyber skills and see how you rank against your peers.

• See how poor security choices can leave critical hospital systems vulnerable to ransomware, putting lives at risk.
